Senior/Lead DevOps Engineer

Description

- BS in Computer Science (or equivalent) or 8+ years of solid experience as DevOps Engineer in 24×7 uptime environment
- Solid understanding of Software Development Life Cycle, Test Driven Development, Continuous Integration and Continuous Delivery
- Solid understanding and experience in working with high availability, high performance, Amazon Web Services operation, maintenance, implementation and design.
- Comfortable with Agile methodologies and working closely within small teams
- Comprehensive experience with AWS technologies including S3, RDS, Redshift, EC2, ELB/ALB, IAM, SQS and Route53.
- Ability to code and script in administrative type language (e.g. Ruby, Python, PowerShell, Bash).
- Experience with orchestration technologies (e.g. AWS CloudFormation, Terraform).
- Strong experience with configuration management systems such as Puppet(preferred) or Chef or Ansible.
- Experience in creating both short and long-term cloud computing technology roadmaps based on an understanding of the organizational strategic directions, technology and business needs.
- Extensive hands-on experience with Linux systems (Redhat/CentOS).
- Strong ability to troubleshoot complex issues ranging from system resources to application stack traces
- Experience with version control systems such as SVN and Git
- Experience in development with scripting languages
- Experience with AWS technologies

Responsibilities

- Develop automation and processes to enable teams to deploy, manage, configure, scale and monitor their applications in data centers and in cloud
- Actively participate in high level team activities such as suggesting architecture improvements, recommending process improvements and conducting tool evaluations
- Help solve business needs with technology by evaluating different technology options and vendor products
- System troubleshooting and problem solving across platform and application domains – will be expected to participate in on-call escalations to troubleshoot customer facing issues
- Takes ownership of end-to-end solutions provided by teams across the organization
